Department:
Military Veterans
REPUBLIC OF SOUTH AFRICA

**STAY
SAFE**

VACCINATE TO SAVE SOUTH AFRICA

TOGETHER WE CAN BEAT CORONAVIRUS

OVERVIEW

FROM THE DIRECTOR GENERAL

DIRECTOR GENERAL
MS IRENE MPOLWENI

The Department of Military Veterans' healthcare benefit is in line with government's overall objectives of providing quality health services as well as building healthy communities. It is furthermore in line with the stipulations of Section 5 (1) of the Military Veterans Act 18 of 2011, which amongst others, states the benefits relating to military veterans and access to health care.

The DMV has also started engagements with the Department of Defence for benchmarking, on the medical cover for regular force members which continues to cover them and their families upon retirement. The accessibility of healthcare services and facilities is critical to the efficient and effective healthcare service delivery to military veterans.

The DMV is also exploring an alternative healthcare service delivery model, either in the form of medical aid for military veterans, or a dual service delivery model whereby the DMV will procure a network of primary healthcare service providers for military veterans within their communities, and then continue to utilize SAHMS and the Department of Health for hospitalisation at their facilities, or to refer to the nearest healthcare facility.

The DMV is currently looking to strengthen relations with the public sector, where Military Veterans can be accorded status equivalent to that of Persons living with disabilities or the aged. In its policy the DMV's objective is to promote preventive rather than reactive health care measures for military veterans and their dependants, as well as to facilitate and coordinate access to health care services by military veterans throughout the country.

The Department will continue to facilitate delivery of benefits and coordinate all activities that recognize and entrench the restoration of dignity and appreciation of the contribution of Military Veterans to our freedom and nation building. We also commit to treating the community of military veterans with courtesy and consideration.

Healthcare is accessible as follows to military veterans:

Through the South African Military Health Service (SAHMS)

Through the Department of Health

Through contracted private healthcare service providers

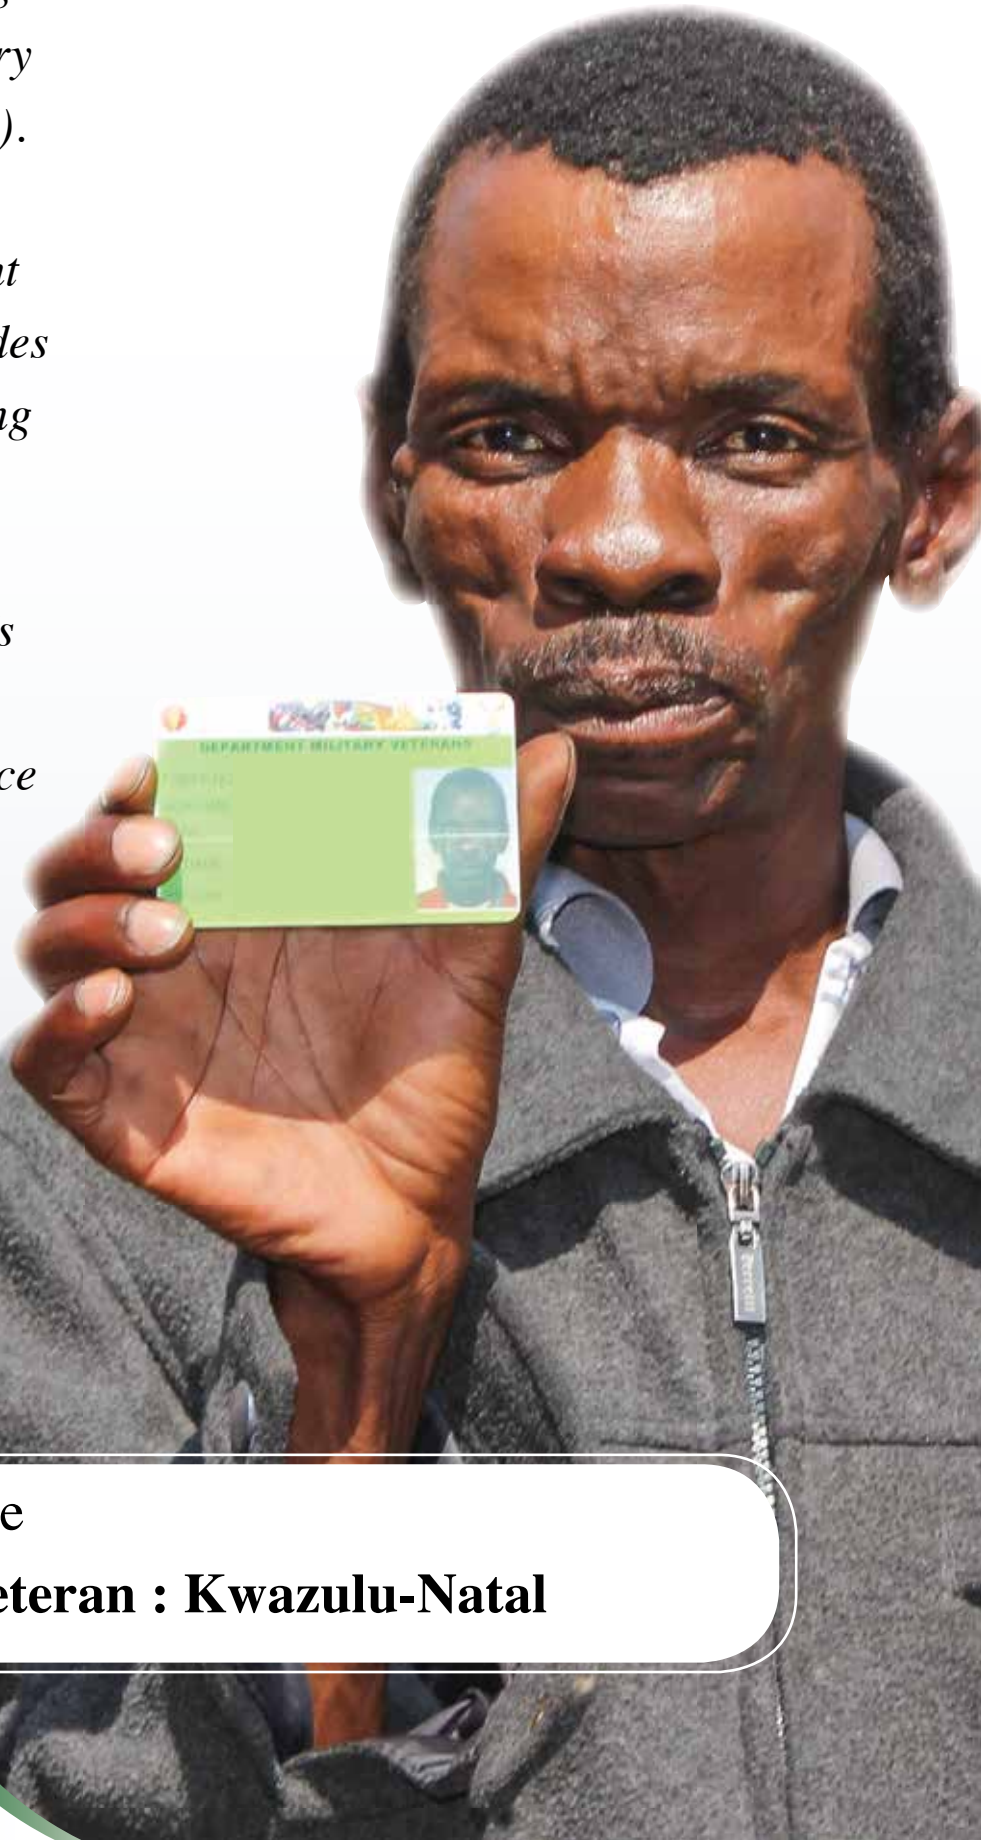

“ More than 19 000 military veterans across the country have been approved to receive healthcare through the South African Military Health Service (SAHMS).

The Department is improving this important benefit through other modes of delivery and leveraging on other government departments whilst waiting for the country’s implementation of the National Health Insurance (NHI).

”

Mr V.S. Tibe

Military Veteran : Kwazulu-Natal

Brand-New Wheel Chair for **DR. TLOU CHOLO**

**Article and Photos by
Ms Pascalinah Skosana
Mr Maropeng Chepape**

Dr. Tlou Theophilus Cholo, who belongs to the Luthuli Detachment of the former uMkhonto weSizwe military wing was on the 16th of August 2022 given a brand new automated wheel chair by the Department of Military Veterans, at his home in Soshanguve north of Tshwane.

Ntate Cholo as he is affectionately known, recently turned 97. The after effects of the torture he experienced at the hands of former security forces during the struggle for liberation, has caused him to develop chronic ailments which require regular medical interventions.

During those activities, Dr. Cholo was at some point forced to travel for 16 hours in a refrigerated truck while crossing back into the country.

He did not receive any medical attention or counselling after the incident and he later developed Rheumatism, Arthritis, constant cramps and pains amongst other illnesses.

The Department of Military Veterans' Health Unit, sourced and delivered an automated wheel chair for Ntate Cholo, who has expressed gratitude for the efforts made by the Department,

Dr. Tlou Theophilus Cholo With His new wheels

and acknowledged that he indeed needed the equipment.

He was also thankful for the good work that is done by the DMV staff who regularly collect him from home to the Hospital

and to the military sick bay for treatment.

He also acknowledged the good service and treatment he receives from 1 Military Hospital (Thaba Tshwane),

singling out Dr. Siphon Mahlangu at Orthopedics who is always understanding and helpful.

On challenges he is facing at the hospital, he explained that at his age he is unable to wake up very early in the morning to be the first in line for treatment at the clinic, as he has to go for different medical checkups in one day, by the time he reaches the Pharmacy to collect his prescribed medication, he is exhausted.

He is still expected to wait and queue for his medication, with the clinic staff not considering his old age status and assisting him timeously.

His plea is that this could be improved for him and all other old patients. Ntate Cholo's experience at the Rietondale Sick Bay has always been an excellent one, as he does not

have to wait in long queues. He is always assisted on time and he is grateful for the good service.

The DMV, strives to reach all military veterans who require medical assistance and is committed to ensuring that no military veteran is left unattended.

It is imperative that both military veterans, their families and the relevant officials of the department work together to alert and inform the Health unit, about any military veteran who is not receiving proper medical attention while they are registered in the Department's database and qualify to access this benefit.

Ntate Cholo further emphasized the need for the DMV, to visit sickly military veterans on a regular basis, as it gives them

hope and that it heals them emotionally to know that the Department cares about them, especially when they are fragile and sick.

THE DMV PROVIDES BRAND-NEW MEDICAL EQUIPMENT TO MR. BHEKI BIYELA

“We would also like to plead with the Department to fast track the process of the pension payout benefit for military veterans which will greatly assist the family”. Said Mrs. Biyela

Article by: Mpho Nkosi

The smile on Mr. Biyela’s face said it all. On the 26th October 2022, the Department of Military Veterans Health unit delivered medical equipment to a struggle veteran by the name of Walter Biyela. The medical equipment included a sophisticated electric medical bed, wheelchair, foam mattress, monkey chain and a walking aid.

The Department supplied the medical equipment, when it was discovered that Mr. Biyela’s medical condition required an urgent intervention.

Mr. Biyela is a struggle veteran from the ranks of the former uMkhonto weSizwe, an armed wing of the African National Congress. During the darkest days of apartheid South Africa, Biyela made a conscious decision to join the African National Congress in 1984.

He was then forced to leave the country for exile, in 1986 and joined the heroes and heroines of the struggle for liberation in Angola, where he received his military training in guerilla

DMV official, Ms Nomvuyo with Mr Walter Biyela in KZN during the delivery of brand-new medical equipment.

warfare.

He stayed in Angola until 1990. In 1991 he was sent to Dakota Vocational Centre, where he received four months of training in carpentry. Later in 1991 the ANC sent him for Medical Officers’ course until 1994. He proceeded to do medical practicals at Mazimbu Hospital in Tanzania.

Mr. Biyela is the last group of combatants to return from exile in 1995, after the dawn of democracy in South Africa. He could not join the South

Success Stories

African National Defence Force integration, process and was instead integrated into the South African Police Service (SAPS), and later resigned from the SAPS in 2008 because of unforeseen circumstances.

Life has been difficult for Mr. Biyela as his health condition deteriorated, and his wife had to leave work to take care of him and the children.

They are currently staying at Amanzimtoti township in Kwa-

Zulu Natal. The Department of Human Settlements (DHS) is aware of Mr. Biyela's health condition and the family was recently told by the Department of Human Settlement that, the process of building them a modified house is underway.

“We appreciate the Department's efforts and, we wish government can assist the family with employment, as we are currently surviving on the SASSA grant which is not enough. We would also like to plead with the Department to fast track the process of the pension payout benefit for military veterans which will greatly assist the family. Said Mrs. Biyela

The family further highlighted the challenges they are faced with, when they have to accompany Mr. Biyela to his medical appointments. Their wish is that the transport benefit can also be activated, as the cost of transporting him to his medical appointment is too high for them.

The Department through the Presidential Task Team on Military Veterans, will continue to coordinate and speed up efforts, aimed at accelerating the pace of service delivery for military veterans as stipulated in the Military Veterans Act. 18, of 2011.

“We appreciate the Department's efforts and, we wish government can assist the family with employment, as we are currently surviving on the SASSA grant which is not enough.

545 MILITARY VETERANS Compensated for injuries sustained during the struggle for liberation

Article by : Mpho Nkosi

In the month of September 2022, 76 military veterans from different associations gathered at the 1 Military Hospital in Pretoria (Gauteng) to be assessed, after they applied for the Compensation Benefit within the Department of Military Veterans' Healthcare Unit. To date 545 military veterans have been compensated at a total of R21 124 175.97.

The Compensation Benefit is amongst the military veterans' benefits that are listed in the Military Veteran Act 18, of 2011. The Act mandates the department to pay a once off compensation to a military veteran, who sustained disabling injuries, or severe psychological and neuro-psychiatric trauma from their participation in military activities.

An applicant of the Compensation Benefit will not be considered if a member was previously compensated in terms of the Military Pensions Act 84, of 1976. The measure is to avoid double payments to military veterans who were already compensated by government.

The Department has received close to 2156 applications for the Compensation Benefit since its inception in 2015. About

DMV official Ms Caroline Mongale briefieng military veterans about the Compensation Benefit

DMV officials with the team South African Military Health Services

1119 (51%) are from the former liberation armies, whereas 1056 (49%) are from the Statutory members.

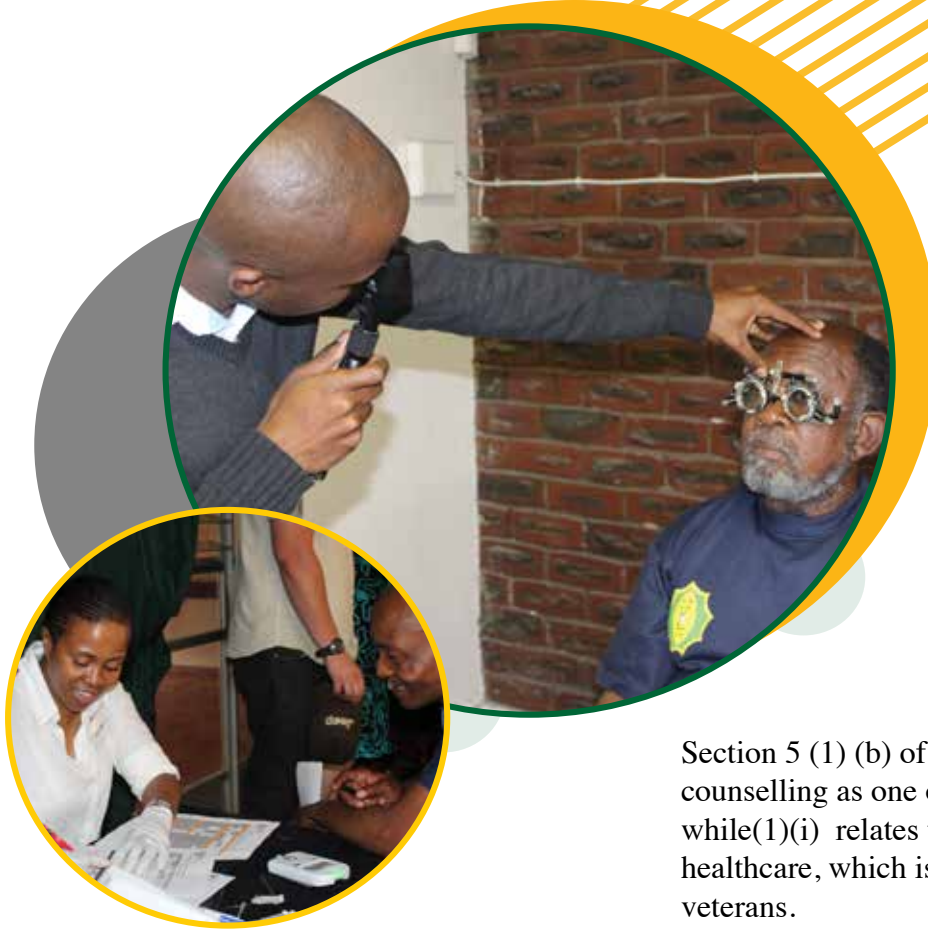

Military veterans who have not applied for any compensation and have sustained injuries, can still visit the Department's offices in their respective provinces. They can also visit the Departments' website (www.dmv.gov.za) to find out more information and also

Col. Mnisi during the DMV medical assessment of Compensation Benefit

download the application form.

The Department will continue to strengthen and manage strategic partnerships to advance delivery on basic social services, housing, healthcare, education and mobility support to military veterans and their dependents across the country, including rural areas.

HEALTHCARE DEDICATED COUNSELLING SERVICES

DEPARTMENT OF MILITARY VETERANS INFORMATION ON ACCESS TO HEALTHCARE DEDICATED COUNSELLING SERVICES PROGRAMS FOR MILITARY

The Department of Military Veterans (DMV) is an organ of state responsible for effective implementation of programs aimed at progressive realization of socio economic rights of Military Veterans, and to some extent, their dependents, as outlined on the Military Veterans Act 18 of 2011, as well as Regulation (Notice R122 19 February 2014).

Section 5 (1) (b) of the Act lists dedicated counselling as one of the benefits and dependants, while(1)(i) relates to the provision of access to healthcare, which is applicable only to military veterans.

Military veterans registered on the national military veterans database, may apply for both these benefits. When applying, the following documents are required :

- Fully completed Benefit Access Form available from: DMV offices (including provincial offices) and the DMV website (www.dmv.gov.za)
- Certified Identity Documents Proof that he/she does not qualify for employer medical aid subsidy (e.g. Letter from Human Resources)
- Proof that medical aid cover is inadequate
- Copy of medical aid where applicable.

The DMV Head Office line is (012) 765 9364. Email address is Health.Care@dmv.gov.za

MEDICAL SERVICES OFFERED

The DMV offers healthcare services to military veteran registered in the National Military Veterans Database. The services include, but are not limited to primary health care services including dedicated counselling, hospital care, allied health, optometry, dental services, home-based care services, frail care services, assistive devices and patient transport.

These services are provided in line with all prescripts and limitations as agreed with the DMV Service providers.

PROCEDURE TO ACCESS HEALTHCARE SERVICES

Currently Military veterans can access all healthcare related services, at their nearest South African Military Healthcare (SAMHS) Facilities or public healthcare facilities in their provinces as per the list below.

Military veterans who live far from SAMHS facilities can contact their nearest Area Military Healthcare Units (AMHU) facilities on the contact numbers provided below, to obtain referral for access to healthcare services at the nearest healthcare facility.

HOME-BASED CARE SERVICES

HOME-BASED CARE SERVICES

The department facilitates and coordinates the provision of home based or frail care services to Military Veterans who suffer from chronic long term illness, are aged and frail, where the family is unable provide such assistance.

These services are aimed at assisting to restore and maintain a persons maximum level of comfort and function while the person is closer to his/her family and community.

ASSISTIVE DEVICES

The department provides assistive devices to Military Veterans who are experiencing mobility challenges. The assistive devices are any devices that helps individuals to perform functions that they might not otherwise be able to well or are unable to perform at all. Generally the term is used for devices that helps people overcome a handicap such as a mobility, vision, mental or hearing loss.

- The following are the basic assistive devices which may be procured by the DMV.
- Wheelchairs

- Crutches
- Spectacles
- Audiology devises
- Other devises not listed above shall be subject to an assessment and approval by the DMV.
- The DMV shall remain responsible for the maintenance of the assistive devise in terms of warrantee of the devise. Any maintenance outside the warrantee of the devise, shall be subjected to the case manager's assessment. The DMV assets policy applies in terms of ownership of the devise.

LIMITATIONS

LIMITATIONS/EXCLUSIONS

- The DMV cannot provide military veterans' healthcare services outside South Africa.
- Dependants are not by law, eligible for healthcare support, however, the DMV provides services for children who experience complications during birth from the ages of 0 to 6 weeks after delivery. Discussions are still continuing towards inclusion of dependents for access to healthcare services through the DMV.
- Currently counselling services are provided to the dependants of Military Veterans
- SADF/SANDF military veterans retired with healthcare packages do not qualify for access to healthcare services from the Department of Military Veterans.
- Active Members who resign and opt not to continue with their Regular Force Continuation Membership Fund do not qualify for the benefit.
- A military veteran found to be abusing his/ her healthcare access benefit will be disqualified from access to healthcare services through the Department of Military veterans.
- Employed military veterans with medical aid cover do not qualify for the DMV healthcare benefit unless they prove that the medical aid cover is inadequate for their healthcare (exhausted).
- Should a military veteran access health care services in a non-DMV approved service partner facility, without authorisation by the DMV, or SAMHS, he/she shall be liable to the costs of the health care associated with that service.
